

GRAVELINE BAY MARSH CREATION PROJECT CONSTRUCTION UPDATE

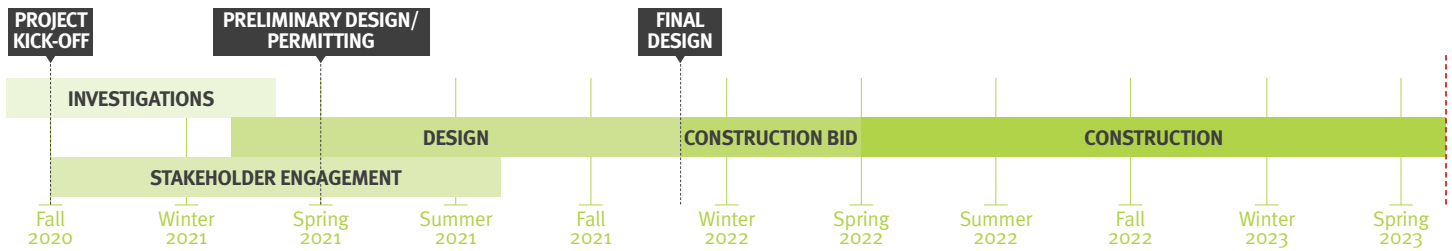

APRIL 2023

- Dredging of approximately 270,000 cubic yards of sand to create 60 acres of marsh mounds has concluded.
- Marsh mounds are being planted with 80,000+ plants. We ask that visitors please stay off these mounds so the plants can establish.
- 600 cubic yards of recycled oyster shells from the Alabama Coastal Foundation shell recycling program were placed on the north facing mounds.
- Project completion date is April 20th, 2023. Dauphin Island Sea Lab and Moffatt & Nichol will monitor the site for three years.
